Integrated Background Screening Now Available in SPECTRA Software To U.S. Customers
Domin-8 Offers Built-In, Low-Cost, Value-Added Services

Mason, OH (February 11, 2008) – Domin-8 Enterprise Solutions, the leading provider of advanced software and services for the property management industry, has announced the immediate availability of a fully integrated Background Screening solution to its U.S. users of SPECTRA property management software.

The integrated Background Screening solution provides comprehensive credit, criminal and eviction checks directly from the SPECTRA software. Domin-8 has partnered with Equifax and LexisNexis to deliver the most accurate and thorough data available.

Additionally, since the Background Screening solution is integrated directly with the SPECTRA property management software, duplicate data entry is eliminated. With applicant information and screening decisions automatically recorded and updated within the software, time to run an applicant screen is significantly reduced.

A unique feature available through integrated Background Screening is the ability to establish a single point of control to enforce pre-set rules across multiple property locations and leasing staff. The system ensures that all staff follows the same applicant screening procedures no matter where they are located.

"It used to be that there was no way to guarantee that all of your properties adhered to the same policies and rules," states Clay Cracklen, Vice President of Sales and Marketing for SPECTRA. "Integrated Background Screening allows you to do this and significantly reduces the possibility of a questionable tenant slipping through the cracks and into your community."

Already built into SPECTRA, Background Screening is easy and affordable. Customers pay a nominal fee to set up the software and create their specific business rules; then are charged per screen conducted. Screening results are returned rapidly, with the status noted as "Approved," "Declined," or "Approved with Conditions." Basic and advanced screening options are available dependent upon the needs of the customer.

Integrated Background Screening is compliant with the Fair Housing and FCRA rules. For more information, please visit www.spectraesolutions.com or call 800-731-8668.
